

Hello, I am Andre Osorio from the 10th grade, and I am currently running for STUCO treasurer. As the treasurer I am responsible for taking care of the financial part of STUCO. With my expertise with numbers and problem solving, I'm confident to say I'm well suited for this challenge. If elected I'll work tirelessly to ensure that budget problems are never in the way of our goals. I aim to be the enabler of our projects to deliver a better school for all of you.

Now I would like to turn my attention to sports. As most of you know, I'm a big "sports guy" myself, and indulge in all that OLM has to offer when it comes to the matter of physical activity. Of course, one could not speak about sports and leave out one of the most entertaining events OLM has seen in the past few years. These being the intramurals. Futsal intramurals have been available for the past three years, while last year's basketball intramurals were attempted, but we are still waiting for the final 'till this day. So, with VAZA you will experience a revolution when it comes to intramurals, because we know that many of you basketball and volleyball players have been deprived of recess fun, while futsal athletes have had at it every year. We will get back on track with basketball intramurals, and inaugurate OLM's very first volleyball intramural, while keeping our soccer fans entertained with yet another futsal intramural season. I know what you're thinking; we won't have time to ensure such events are organized efficiently. However, I can assure you that all VAZA members are avid sports fans, and therefore we will always strive to give you all what you deserve, and not just have you sit on the bleachers cheering. We want everyone to have a fair share of the frontcourt, and most importantly, engage every possible student in physical affairs. Because let's be serious, cheering for your class is fun, but who wouldn't want to be out there having their classmates cheer for them? So, if you're into intramurals and want to have more opportunities to show the school what you are made of, look no further than VAZA.

I would now like to tell you all a little bit about VAZA. Of course, there isn't much history to mention, we decided that we were gonna run for STUCO, what? Maybe about a month ago? At first, we didn't intend to actually get this far into the campaign; we had the idea just for fun. That same day Victor created a group in whatsapp for us to

talk about what ideas we had in mind, and what we could do to revolutionize STUCO. I think I was the one who committed to the idea of VAZA the latest. I had been hesitant on whether I wanted to have this responsibility, to be one of the heads of the student body. But a couple of weeks back Alexandre, Victor and Ze made me realize that this school is my home. They showed me all that I could do to make my home a better place, and after this moment I became engaged and saw VAZA as a real thing. It was then that we noticed we were doing something not just for us, but for the good of OLM. Many of you out there probably thought that we wouldn't be good for anything. We were gonna put the school in jeopardy and not do our jobs properly. And I can assure you, we are not going to have the prettiest posters, we are not going to have the most colorful designs or craftsmanship to exhibit the best visual representations of ideas. But don't let that affect your voting status, because the idea is what matters, and we are determined to put every single idea we put forth today into play next year, seeing as though all of them have already been accepted by our administration. We will force ourselves to make this your home just as much as it is ours. The four of us entered this school when we were 2 or 3 years old, we care about it a lot. So don't let the fact that we are boys or that you believe we don't care for you lead you astray. Believe in what we can deliver, because we can promise you that we will dedicate ourselves and try our very best to lead OLM into a new era of satisfaction. We want you to be happy with our leadership, and believe us, we will not stop until we have done all we can. I would like to conclude my speech quoting one of the most well known thinkers of the 21st century: "we started from the bottom now we're here". Thank you all, and remember, vote 12, vote VAZA. Thank You!
